

PLENTY TO INTEREST THE PROFESSIONAL SAILOR

Alongside the recreational boats, the Auckland International Boat Show will have plenty for commercial and workboat owners to view. Nowhere else will the commercial boating market see such a concentration of big-power engines, generators, refrigeration systems and latest marine electronics in communication and navigation in one place. The big players in electronics will be at the show, including Advance Trident, importer and distributor of Simrad, B&G, NorthStar, Seiwa, Sidepower and radar, GPS and autopilots.

Also leading the charge in the electrical and electronic service area are Crystal Electronics, a company providing engineering, sales, service, design and installation from small yachts to luxury and commercial ships.

Electronic Navigation Ltd is a privately owned company which develops, manufactures and imports quality marine products for small craft, right through to large commercial vessels.

CruzPro Ltd is the New Zealand manufacturer of marine instruments, digital gauges and electronic monitoring systems for fuel and tankage, gas vapours and electrical systems.

Enertec Marine Systems is a major New Zealand supplier of marine system products including battery chargers, generators,

alternators, frequency converters, electrical switchboards plus more.

GME is a manufacturer and wholesaler of marine electronics for all types of vessels with the 406 EPIRB currently their leading product in demand.

Lusty and Blundell Ltd supplies marine systems including hydraulics, mechanics, electrics, electronics, fluid handling and navigation.

Absolute Marine, supplier of Marine products including FLIR cameras, Navman products, C-Map electronics, hatches and more.

Alphatron Pacific Ltd import and distribute electrical power generation, energy inverters and conversion equipment.

Trans-Pacific Marine will have Sea Pro, and electronic charting system for laptops, including an easy to use, inexpensive GPS navigation system chart folio for all of New Zealand.

Crew qualifications are a major part of the commercial workboat industry. Mahurangi Technical Institute offers a range of maritime qualifications from introductory level through to commercially oriented courses.

Maritime New Zealand oversees the safety of the marine environment in New Zealand waters.

All the big engines will be on display including: John Deere

with a network of dealers New Zealand-wide present their range of marine engines in the 75 to 610hp.

Whiting Power Systems are marine power specialists, representing Yanmar and other marine equipment including generators, air-conditioning, steering, controls, anti-vibration and propulsion products.

Volpower NZ Ltd supplies Volvo Penta marine engines and propulsions, including IPS technology, diesel engines up to 800hp and petrol engines up to 420hp.

Transdiesel is the distributor of MTU, Detroit Diesel, Perkin's, Sabre and Lombardini marine diesel engines and gensets.

South Pacific Diesel Systems Limited are proud to be the New Zealand importer and distributor of Scania Industrial and Marine Engines.

Shaw Diesels Ltd are leading importers, retailers and stockist's for Lister, Deutz & Gardner engines and gensets.

HamiltonJet are the world's leading manufacturer and supplier of marine water jet propulsion systems and controls.

To keep fuel flowing sweetly, Marine Diagnostics Ltd will launch a new product, Fuel+Aid which it has developed in New Zealand for preventing diesel bug.

Altex Yacht and Boat Paint have been manufacturing high quality long lasting marine protection and antifoul paints for over half a century.

MEC Marine is the New Zealand agent for Coppercoat marine antifoul paint from the United Kingdom. This product is claimed to have a proven lifespan of ten years. International Marine Coatings are specialist in TBT-free antifouling, abrasion resistant coatings, ballast tank coatings and fouling control systems.

MND Marine has also launched a new shrink wrap service – this includes wrapping whole boats or parts of boats for refits, or for freight overseas.

Also supplying plenty of grunt for the big boats, Maxwell Marine manufactures marine windlasses and ancillary equipment for vessels ranging from 6m to 90m.

Naiad inflatables are designed in New Zealand and provide custom made, robust inflatables for the recreational and working boat markets.

MGE Engineering offer total marine services, for new builds, to general vessel maintenance, survey work and overhauls.

Foreman Building Systems distributes and markets marine thermal and acoustic insulation products and accessories for the marine environment.

Soundguard offer an alternative to sound proofing and insulation.

RFD NZ Ltd is one of the largest marine safety companies in the world. They manufacture and service liferafts, life jackets and other safety marine equipment.

Safety at Sea is introducing two new agencies to the industry: Jonbuoy, a sophisticated danbuoy system, Ocean Safety Liferafts and Mobi Alarms a crew safe system for man overboard.

Lighthouse Marine Equipment Limited brings a range advanced marine lighting solutions, marine desalination plants, toilets, holding tanks and sanitation systems, and anchor winching equipment for vessels from 6-50 metres.

Not forgetting the commercial industries favoured magazine *Professional Skipper* which once again will be present in a new spot in the big engine court on Te Whero Island, an ideal time to renew ones subscription.

These are just a snapshot of the exhibitors the commercial operator will find all in one spot at the Auckland International Boat Show, March 5-8, 2009, 10am to 6pm, Viaduct Harbour, Auckland, www.aucklandinternationalboatshow.com, Marine Industry Association, ph (09) 360 0056.

... the future of marine lighting.

Hella marine

World leading LED lighting technology,
designed and manufactured in New Zealand.
Power saving, ultra reliable and ultra safe.
